The Junior Students' Classical Series

Crown 8vo. 1s. 6d.

Junior Students' First Latin Translation Book.

Containing 173 Latin Passages, with Preparations, Notes, and a Latin-English Vocabulary; and English Exercises for Re-translation, with an English-Latin Vocabulary. By A. H. THOMAS, M.A., *Crescent House School, Brighton*. With a Preface by J. ARNOLD TURNER, B.A., *Assistant Master at Haileybury College*.

"This little book seems to possess qualities which ought to make it useful to learner and teacher alike. It is simple and interesting in style and subject matter, and is very carefully graduated."—*Glasgow Herald*.

"We feel sure that both the Latin stories and the re-translation exercises founded on them will prove most useful for beginners in Latin."—*University Correspondent*.

"Mr. Thomas has carried out with satisfactory results the two principles of graduating the difficulty of passages to be translated, and of making them interesting."—*Spectator*.

The aim of this book is to supply practice for the beginner in Latin inflexions, and in the easier rules of the Syntax of Cases and Moods; and thus to carry him through the necessary period of fairly literal translation to a point when, equipped with a fair vocabulary and a working knowledge of common rules, he may begin easy pieces of continuous narrative without the aid of an English-Latin Dictionary, or a Latin Grammar.

The practice of demanding a rote knowledge of all Syntax rules is now, happily, discredited, and most teachers are agreed that Syntax can be taught more rapidly and more effectually by oral explanation of rules, supplemented by practice in their application.

It is suggested that the Notes on each Exercise should form the substance of a short *viva voce* lesson, that the examples alone should be committed to memory, and that the pupil should write the exercise with no other aid than that of the special Vocabulary. The grammatical analysis of the Compound Sentence has been kept in view throughout. The verb has been taken first because of its importance in the sentence, and for the same reason a few paradigms and tables of formation have been added to aid the latter.

"Matter and form are alike satisfactory. 'Stories from Roman History' occupy something like half the book, and from the days of Romulus and Remus down to the Battle of Philippi, many a moving story, familiar to many a generation of schoolboys, has been drawn upon. Then there are extracts bearing on 'The Subjugation of Britain,' 'Anecdotes,' and 'Selected Pieces of Latin Poetry';—all short and moderately easy."

By M. A. NORTH, M.A., and A. E. HILLARD, M.A., *Assistant Masters at Clifton College.*

A Latin Version, 6s. net, to be obtained direct from the Publishers only, by authenticated Teachers. *In the press.*

This is a Latin Prose Book arranged for the work of a School, and by their division of the Table of Contents the Authors suggest how much should be assigned to each of six successive Forms. It may be begun as soon as a boy is able to translate simple sentences.

It consists of 256 Exercises, with Rules, Examples, and Vocabularies. The Exercises are (from the beginning) partly sentence-exercises and partly "connected pieces." Each has been written expressly for the place in which it stands, so that no word or construction may be required which has not already been taught. Each Exercise has a separate Vocabulary, printed at the end of the book. These Vocabularies are meant to be learnt, so that definite progress may be made in vocabulary as well as in the construction of sentences. A boy who has worked through them will know most words commonly required for Prose Composition below the 6th Form.

The book has been used in a privately printed edition at Clifton College during the last two terms, and the present edition has therefore benefited by the experience gained during its use.

Secundae Lib. V. (De Suppliciis). Edited, with Introduction, Notes, and Appendix, for Upper Forms in Schools, by W. CECIL LAMING, M.A., *Formerly Scholar of St. John's College, Cambridge.*

"The notes are models of brevity, and are content to stimulate curiosity by means of suggestive references."—*Journal of Education.*

"A practical and straightforward set of notes to a speech which is well worth reading." *Guardian.*

"The book edited by Mr. LAMING is perhaps the best known, and is specially interesting as containing the most famous climax about scourging and otherwise maltreating a Roman citizen, often cited to illustrate an incident in the life of the Apostle Paul."

"Mr. MORICE has provided an excellent selection."—*Spectator.*

"The selections of poetry and the hints are good. We trust schoolmasters will look at the book."—*Guardian.*

"Mr. MORICE's passages are suitable and no hackneyed. The usual introductory hints, though brief, are of a good deal more than usual excellence, both in matter and still more in manner."—*Saturday Review.*

"The volume is a very good one of its kind."—*Schoolmaster.*

"We have looked through this Elementary English Grammar and formed a very favourable opinion of it. It seems to be compiled with much intelligence and knowledge of what is suitable for young minds. The matter is well graduated, and presented to the pupils in a clear and interesting manner. The type is clear and bold, and the examples illustrate the rules and principles in a plain and forcible way."—*Schoolmaster.*

A Primer of French Grammar. For Preparatory Schools and the Lower Forms of Public Schools. By A. A. SOMERVILLE, M.A., Assistant Master at Eton College.

"The book is a model of good printing and arrangement, and deserves to become popular."—*Guardian*.

"The book will do much to make up for the want of harmony which exists between preparatory and public schools in the teaching of French."—*Educational Times*.

"In a Primer, as we have remarked before, print is more than half the battle. Mr. SOMERVILLE'S Primer is excellently printed. The object aimed at is to provide a standard French Grammar for preparatory schools, which shall be accepted as a measure of what a boy should know when he enters a public school—an analogue, in fact, to the Latin Elementary Primer. If any unauthorised grammar can attain this object, it is Mr. SOMERVILLE'S. The rules are clear, the examples and explanations simple, and a rare moderation has been shown in the treatment of exceptions and difficulties."

"We cannot describe in detail all the little thoughtful devices made use of to adapt the book as a first year's study for beginners of all ages and capacities; we can only say, that except that the retranslations into French might have begun a little earlier, we can find no possible fault or error of any kind in the book. Its conception may almost be termed a stroke of genius, and if a large part of genius is the capacity for taking infinite pains the authors have a double claim to the appellation."—*Guardian*.

Advanced French Texts. *The General Editors of these Texts are H. C. STEEL, B.A., and R. J. MORICH.*

The Texts of this Course are intended to supply, for the higher classes of schools, French Reading Books of such length that they may be finished in the course of one or at most two terms. Selections are made from the works of various French authors of modern date; and when condensation is necessary to bring a volume within the appointed limits, care has been taken that the interest of the story shall be sustained. The Notes do not deal with elementary grammar, nor is translation given of words found in every school dictionary; but special attention is paid to less usual constructions and to idiomatic phrases in which the ordinary dictionary is deficient.

Periods of European History

General Editor, ARTHUR HASSALL, M.A.,

STUDENT OF CHRIST CHURCH, OXFORD.

THE object of this Series is to present in separate Volumes a comprehensive and trustworthy account of the general development of European History, and to deal fully and carefully with the more prominent events in each century.

It is believed that no such attempt to place the History of Europe before the English Public has yet been made, and it is hoped that the Series will form a valuable continuous History of Mediæval and Modern Europe.

DIVINITY

*Crown 8vo.**The Books of the Bible for use in Schools.*

The Four Gospels and the Acts of the Apostles separately. With Introduction, Notes, Maps and Plans. *Edited by the Rev. A. E. HILLARD, M.A., Assistant Master at Clifton College.*

St. Luke's Gospel. 1s. 6d.

St. Matthew's Gospel. [Shortly.]

This edition of the English text of the Four Gospels and the Acts of the Apostles is meant to provide boys with concise notes, such as have been found from experience to be most useful to them.

The first volume, on St. Luke's Gospel, contains explanatory and historical notes, and a marginal analysis of the text, together with maps and introductions (1) on St. Luke and his Gospel (2) on Palestine in the time of Christ. A complete synopsis of the Life of Christ is added, showing by difference in type the parts recorded by St. Luke. The notes, &c. will meet the requirements of all who wish to prepare the Gospel of St. Luke in English for examination.

It is intended to issue eventually, on the same lines, all the BOOKS OF THE BIBLE which are usually read in schools.

"The text of the Authorised Version is printed with foot notes, the most important differences between the Authorised Version and the Revised Version are given in parallel columns; there is a good synopsis of our Lord's life, a list of St. Luke's peculiarities, and other useful material. Above all, the work is so done that the book can be heartily recommended to Church Schools."—*Guardian*.

"The introduction, notes, and maps of this handbook to the third Gospel are of a very practical nature. The synopsis of the life of Christ, and the marginal analysis of the text are most helpful."—*School Guardian*.

"This volume seems to give the series a good start."—*Expository Times*.

"It is difficult, indeed, to conceive that anything better could be provided for the purpose."—*Glasgow Herald*.

Crown 8vo. 5s.

A Manual of Practical Logarithms.

By W. N. WILSON, M.A., Master of the Army Class at Rugby School.

"At the commencement of each chapter examples are worked out to illustrate the methods to be pursued; they are very clearly set out, and by their help boys in the highest division, knowing how to use logarithmic tables, will find no difficulty in working through the book by themselves. . . . We commend to masters Mr. WILSON'S notation in writing the characteristics after the mantissa in preference to that usually found in other works on Logs."—*Guardian*.

Book I. separately, 1s. 6d., and Books I. and II. together, 2s.

"We can strongly recommend the work for its many good features; the proofs are clear, the arrangement graphic, and the general get-up of the book highly creditable to all concerned."—*Schoolmaster*.

"A valuable feature of this work consists in the presentation of the propositions in the form best adapted for written school work, and the interpolation of numerous easy problems as exercises on the several propositions. The figures have been very carefully and intelligently prepared."—*Science and Art*.

"This is an admirably arranged text book of Euclid. All the propositions and also the many exercises worked are set forth in an exceptionally lucid manner. A feature of the book is the reduction of the proofs of the early propositions into the technical form and language of logical syllogism. . . . The book is certainly admirably complete in every detail, and the clearness and neatness of the type and figures will tend to make it still more attractive and popular."—*Lyceum*.

Elements of Music, Harmony, and Musical Form.

A Course of Study compiled expressly for the use of Students preparing for Examinations. By M. I. RICHARDSON. Edited by GEORGE RISELEY, *Organist of Bristol Cathedral, and Professor of the Organ at the Royal Academy of Music.*

"The Author is to be congratulated on this scholarly work; the book is clearly systematized, and the style clear; it will be a boon to conscientious students."—

Birmingham Daily Gazette.

"Is what it professes to be—a careful compilation; its examples are well chosen from the great writers, and its examination papers well set."—*Guardian.*

"Is really a very luminous and carefully considered exposition of the general groundwork of musical theory. Its information is nicely graduated, and is expounded with a real feeling, not so much for personal display as for simplifying and clarifying it for the sake of youthful readers. Each chapter concludes with a paper of examination questions that cover all the ground proposed for study. The examples selected are admirably chosen, and, in a word, we recommend the book quite particularly and impartially to the teacher, no less than to the young student of music. A book of this kind has long been much needed."—*Pall Mall Gazette.*
